Absolute® Software specialises in technology and services for the management and security of mobile computers and smartphones.

Products

For consumers and small businesses, we provide CompuTrace® LoJack® for Laptops

For larger businesses, we provide:

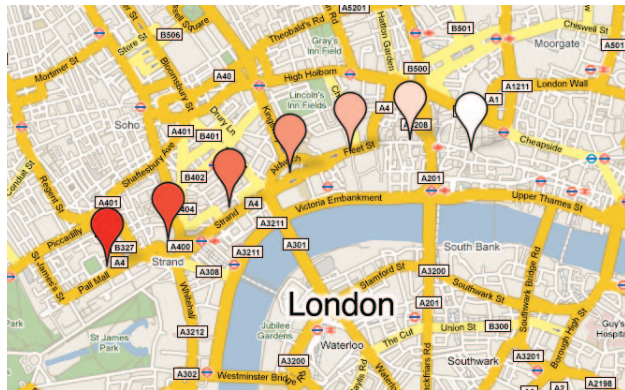

- CompuTrace One
- CompuTrace Data Protection
- CompuTrace for Netbooks
- Absolute Track
- CompuTrace Mobile

Our technology allows us to work closely with police around the world to help them recover stolen property, catch criminals, and solve crimes.

If a computer with CompuTrace technology is stolen and the crime is reported to you, we can provide you with tracking information and the necessary documentation to procure search warrants and aid in your investigation.

Tracking Stolen Computers

Once a computer is reported stolen, the next time it connects to the internet the Absolute Theft Recovery Team will launch an investigation, forensically mining the computer using a variety of procedures, including key captures, registry and file scanning, geolocation, and other investigative techniques to determine who has the computer and what they're doing with it.

Most importantly, we will use our technology to pinpoint the physical location of the computer and work closely with you to recover the stolen property.

Theft Recovery Team

The Absolute Theft Recovery Team helps to return thousands of computers to their rightful owners each year. Our team is staffed by former police officers and law enforcement professionals who have worked hard to build positive relationships with police and security agencies around the world. Knowing how law enforcement works has helped Absolute Software achieve the highest recovery rate in the industry.

Since our background is in law enforcement, we know exactly what you need to carry out a successful investigation. Using our technology, we collect information and do all the paperwork – providing it to you so it can easily be used as evidence to trace IP addresses, obtain search warrants and to detect the crime.

Examples of evidence gathered includes:

- IP address of user account
- Detailed information of the unauthorised user or thief
- The physical location of the stolen computer using geolocation maps
- Intelligence on related criminality

Feedback

"I couldn't believe I was able to get my laptop back, I'm really glad I bought Lojack when I did. My friends and family were impressed that my laptop was tracked and recovered in the U.K. I now recommend Lojack to everyone. It was a great investment."

Chris Gorton

Victim of laptop theft in Heathrow Airport
and delighted Computrace Lojack for Laptops customer

"As well as helping police to tackle crime, this software addresses the ACPO and Home Office desire that valuable consumer goods should have crime prevention measures incorporated in the design and manufacture."

Alan McInnes

General Manager, ACPO Crime Prevention Initiatives (CPI)

Official Police Security Initiative

The Facts

- Absolute Software has been tackling computer theft for over 15 years, recovering 3 out of 4 stolen computers that call into our monitoring centre
- Through our partnership with leading PC manufacturers, our technology is built into most computers at the factory
- The Absolute Theft Recovery Team has 650+ years of combined law enforcement experience
- Our recovery officers and liaisons are locally-based and available to assist you in solving crimes that involve computer theft
- You receive real-time intelligence and case updates as developments happen
- We do the paperwork so you can obtain search warrants and quickly close your case
- Our secure database contains owner information and thousands of serial numbers from stolen computers
- We provide FREE onsite or locally based certified training
