See and Secure Your Data and Devices

Endpoints go dark, data drifts without notice, cloud apps add another layer of complexity, users neglect security policies, and controls are disabled daily. Over time, endpoints accumulate security debt and are prone to compromise when exposures turn into exploits.

IT operations and security teams need to see, understand, and resolve hidden risks within their device population. They require asset intelligence across every endpoint, device and data analytics to unmask compliance failures, and automated endpoint hygiene to improve their security posture in the face of growing threats.

Asset Intelligence

Persistent Endpoint Visibility: On and Off the Network

Absolute eliminates dark endpoints. Our patented Persistence™ technology is already embedded in the firmware of the devices of over 25 leading manufacturers including Dell, HP and Lenovo. Because of these exclusive partnerships, you get unrivaled visibility and control of all of your endpoints — whether they are on or off your corporate network.

Uncover endpoint hygiene gaps to decrease exposures and risk of compromise. Identify disabled security controls, sensitive data at-risk, and user activity or negligence with your devices, data, users, and apps.

Your Success Criteria:

- **Embedded & Self-Healing**
  The only platform powered by self-healing technology embedded in your device's firmware

- **Software Analytics**
  Detect changes to applications, while capturing unauthorized software on any device

- **Encryption & Anti-Malware Monitoring**
  Flag devices where encryption or anti-malware is disabled, and restore security controls — with zero human touch

- **Hardware Analytics**
  Discover every endpoint and benchmark devices against security policies and regulatory standards

- **Geofencing**
  Put a ring around your data and devices to enforce physical boundaries in this post-perimeter era

- **Device Utilization**
  Understand which devices are inactive, and where reallocation needs to occur

Automated Endpoint Hygiene

Transform the Gold Image to Diamond: Hardened, Pure, Resilient

Absolute is the first and only endpoint visibility and control solution to persist security controls. Once activated, it never loses sight or control of any endpoint. IT teams extend Persistence to regenerate other applications, to maintain endpoint hygiene, and empower their devices with self-healing capabilities.

When endpoints drift, exposure risks are created. Absolute rips devices back into alignment and enables hardened resilience to avoid devastating data breaches and maintain business continuity.
Your Success Criteria:

- **Security that Scales**
  Expand endpoint control around the globe, gaining control across every device from a single cloud-based console.

- **Data Protection Assurance**
  Automate your data protection by persisting security controls such as: SCCM, DLP, encryption, anti-malware, network access enforcement.

- **Automated Workflows**
  Remove the risk by automating remediation tasks with unique commands and workflows.

- **Application Continuity**
  Stop disruptions to user productivity and business continuity with self-healing applications.

- **Configuration Hardening**
  Extend Persistence technology to regenerate controls, apps and agents on any endpoint.

- **Lifecycle Management**
  Protect configurations and hygiene standards from the moment devices leave the factory.

**CONTINUOUS COMPLIANCE**

Stay Audit-Ready with Ongoing Control Checks, Data Discovery, and Remediation Actions

The Absolute platform reaches deep into every device, discovering sensitive data at-risk, and flags endpoints lurching toward compliance failure. From a single, cloud-based, console IT and IT security teams validate data protection and eliminate compliance failures with tailored controls and custom assessments for any standard: HIPAA, GDPR, PCI, SOX as well as internal security and privacy policies.

Security automation and orchestration kicks on to instantly resolve violations by revising security controls and configurations, restoring anti-malware, or even freezing the device or isolating it from data access. Persistent visibility and control gives organizations what they need to be audit-ready at every moment.

Your Success Criteria:

- **Standards Benchmarking**
  Discover weaknesses and security failures within existing controls and close the compliance gap.

- **Command Airtight Policy**
  Push security controls in lock-step with standards including: CIS, COBIT, NIST, SOX and internal guidelines.

- **Device Tracking and Remediation**
  Reach missing, stolen, or lost devices with a digital tether to confirm endpoint hygiene and data protection.

- **Endpoint Hardening**
  Persist apps and agents — SCCM, encryption, AV or VPN — from a single command center.

- **Endpoint Data Discovery**
  Pinpoint data at-risk or vulnerable to privacy violations such as PII, PHI, PFI and intellectual property.

- **Attestation**
  Validate data protection and compliance requirements with unrivaled line-of-sight to every device.

**BRING IT ALL TOGETHER**

Today’s distributed organizations require persistent endpoint visibility and control. To keep pace with a mobile workforce, IT and IT security teams rely on the powerful fusion of asset intelligence, automated endpoint hygiene and continuous compliance. They rely on the Absolute platform.

**ABOUT ABSOLUTE**

Absolute empowers more than 12,000 customers worldwide to protect devices, data, applications and users against theft or attack—both on and off the corporate network. With the industry’s only tamper-proof endpoint visibility and control solution, Absolute allows IT to enforce asset management, security hygiene, and data compliance for today’s remote digital workforces. Patented Absolute Persistence™ is embedded in the firmware of Dell, HP, Lenovo, and 26 other manufacturers’ devices for vendor-agnostic coverage, tamper-proof resilience, and ease of deployment. See how it works at [www.absolute.com](http://www.absolute.com) and follow us at @absolutecorp.
