"There's nothing else out there that gives us that complete visibility of our devices... And it's very much an insurance policy for us, knowing that, as much as we protect our data, should the devices disappear, we can safely say to our clients, 'The data has been wiped; you don't need to worry.'"

INFOSEC MANAGER, CORPORATE LEGAL SERVICES COMPANY

"Absolute Persistence gives us the assurance that theft is not a recurring scenario and that stolen devices don't become breach liabilities. Our other tools were not able to detect these devices and give us the sense of security that we now have."
