

Web Usage Reporting

Let Data Drive Adoption, Compliance & Security

Remote IT leaders continue to be faced with the problem of visibility. What are employees using their devices for? Are they making use of approved online applications? How much are they engaging with different types of online content? How do you identify employees who are violating web content or search policies, creating risk to company devices and networks?

The Absolute platform allows you to easily generate Web Usage Reports to know what websites users are actively engaged with, how much and when. Monitor how training and enablement impacts the adoption of web tools and adjust your plans accordingly. Ensure the suite of remote work tools you've deployed are being used as expected. Identify potentially harmful or unsafe web usage so you can act against cyberattacks and compliance issues.

BENEFITS

Web Usage (Last 7 Days)

See how much each website was actively used and in focus. Whether a VPN or proxy is used, on or off the corporate network – get complete visibility. Easily filter on categories to identify risky or inappropriate usage.

Website	WEB USAGE Total	WEB USAGE Daytime	WEB USAGE Evenings & weekends	Devices	Category
dazn.com	7h 0m	0m	7h 0m	25% 1 of 4	Digital Media, Sports
yahoo.com	4h 42m	2h 38m	2h 4m	25% 1 of 4	Finance
pearson.com	2h 36m	1h 37m	58m	25% 1 of 4	Professional Services
windy.com	2h 31m	28m	2h 2m	25% 1 of 4	Science and Technology
youtube.com	1h 37m	47m	49m	75% 3 of 4	Adult Themes, Digital Me...
whatsapp.com	45m	5m	40m	25% 1 of 4	Online Chat
amazon.com	25m	0m	25m	25% 1 of 4	Specialized Shopping
www.google.com	22m	14m	8m	75% 3 of 4	Web Search
mail.coode.com	22m	22m	<1m	25% 1 of 4	Web-Based Email

See usage for each individual website within a domain. For broad use site like YouTube determine if usage reflects acceptable online behavior, or not.

With this data in hand, you can:

1. Monitor adoption and optimize licensing of web-based tools & cloud applications

Web Usage Reports allow you to analyze usage patterns to make better-informed decisions on the tools you are currently using, allowing you to optimize licensing spend to maximize your budget. You will also be able to identify trends and emerging needs within your workforce, a particularly interesting benefit for helping shape your organization's IT strategy.

2. Detect inappropriate usage of corporate devices

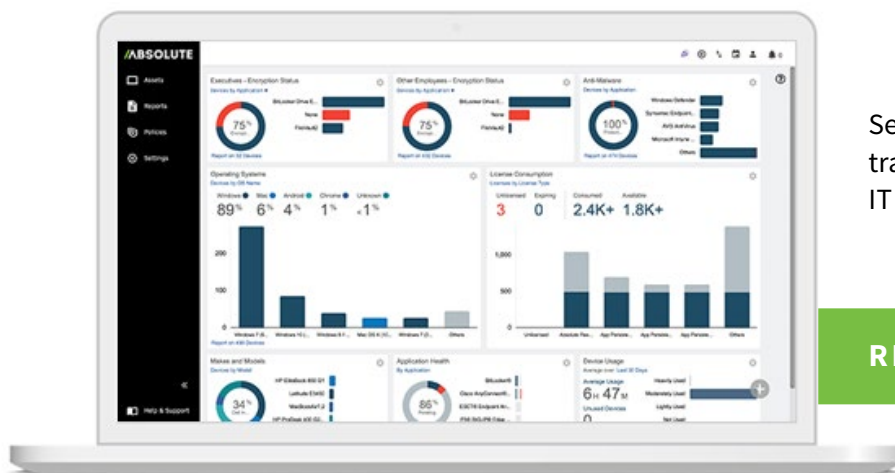

Find restricted domain serving adult content, gaming or non-authorized websites, see which users have been using them, and take direct action with individual users; establish new policies, or implement web filters.

3. Investigate security incidents

If a security incident has occurred, Weekly Web Usage Reports can identify if other users have visited an insecure web page. Prevent similar incidents by identifying the sites you need to block and proactively contact users.

EDITIONS

Web Usage reporting is available with Resilience licenses. Available for Windows and Chromebook Devices. Chrome browser only.
