

Absolute Educate

Build Your Team and Your Defense Posture

BENEFITS

- **Enhance asset management and endpoint security skills using Absolute Software**
- **Leverage best practices to increase your security posture and reduce risk.**
- **Build a customized training program to solve your specific asset management and security challenges**

ABSOLUTE EDUCATE ANSWERS YOUR TOUGH QUESTIONS:

- **How do I build an effective endpoint security strategy?**
- **How can I quickly repair and recover my endpoints if disaster strikes?**
- **How do I ensure my devices are being used according to set policies?**
- **How can I generate the reports I need to make effective decisions?**

Security incidents do more than just ruin your day — they can bring your organization to a grinding halt. While there's no silver bullet solution, there are tried-and-true principles you can adopt to develop a multi-layer defense strategy to keep your endpoints secure.

The Absolute Platform has many unique capabilities to manage device health, extract insights, and react to security and asset management concerns. Now that you've started your journey with Absolute, you can leverage **Absolute Educate** to benefit from our years of expertise and proven best practices to enable your teams and strengthen your overall security posture.

Our hands-on approach to education is based on industry standards, proven methodologies, and decades of experience — **security training done right.**

ENABLE YOUR TEAM WITH ABSOLUTE CONFIDENCE

Learn from our proven asset management and security operations curricula. You can choose from specific training modules, or build a customized program tailored to your specific needs.

- **Endpoint Inventory Management**
Audit your inventories, and ensure your policies are visible and enforced. Learn best practices to detect suspicious devices and quickly recover lost devices.
- **Software Asset Management**
Learn software best practices and ensure your software policies and license management requirements are met.
- **Device Usage**
Learn how Absolute Platform can help you monitor and report on the insights you need. Learn how Absolute Reach scripting, web and device usage, and geolocation can be used to audit and enforce policy compliance.
- **Device Security**
Expand your knowledge of device policies, industry compliance, device controls, and Absolute Platform capabilities to enhance your endpoint security program. Learn to configure resilience capabilities to ensure your applications - such as anti-virus - are always on with Absolute.
- **Risk and Compliance**
Understand risks to your organization through console access and in-depth audits, get the workflows you need to be successful, and discover key regulatory challenges Absolute helps you solve.

• **Security Incident Response**

Learn how enrich your security system by integrating Absolute with your existing tools, controls, processes, and systems. You'll learn how to prepare for the worst, recover quickly, and implement best practices throughout your endpoint security lifecycle.

• **Security Automation**

Learn about specialized code we can create to help you gain insights, react faster, and connect your disparate systems.

• **Custom-Built Defense Strategies**

Through hands-on consultation sessions, we'll work with you to build targeted plans tailored to your needs and requirements.

Our Professional Services team is dedicated to your success, and we work alongside your team to align learning modules with the business outcomes you need to be effective with Absolute Software.
