

Absolute Resilience for Student Devices

Support 1:1 Learning Success

Effective Device Management Matters

With the dramatic increase in devices deployed to maintain and expand 1:1 programs, school districts need to ensure students are kept safe, connected, and productive while using devices on campus, at home, and at off-campus locations.

For IT administrators this means managing devices from a remote location, keeping tabs on where devices are located, producing reports as evidence for audits, and handling annual missing device collection.

Ensuring that student devices are effectively managed is essential is to:

- Lessen the burden on IT resources and reduce costs
- Recover lost or stolen devices
- Avoid adverse funding audit findings and non-compliance penalties
- Reach student learning outcomes

1:1 Fleet Management Made Simple

Absolute Resilience for Student Devices helps IT teams at K-12 school districts effectively manage, track, secure, and report on student Windows devices. With device visibility and control capabilities as well as an annual missing device collection service, school districts ensure device fleets are managed and protected all year long, use of federal funding for mandated 1:1 programs is accounted for, and device loss is reduced. By outsourcing onerous missing device collection to Absolute's team of experts, give your IT teams piece of mind and time to focus on more important tasks.

Your Benefits

- **Effectively track, monitor, and secure student devices** no matter where they are, on and off campus.
- **Stay audit-ready with customizable reports** on devices purchased with state or federal disbursements.
- **Improve missing device return rates** by using Absolute's team of experts to effectively manage the entire missing device recovery process for you.
- **Lessen demands and stress on your IT team** with an easy-to-use device management tool and outsourced collection service.

+74% Devices deployed by Absolute K-12 education customers from 2019 to 2020

+45% Devices reported as missing or stolen in spring 2021 versus 2020

Included Capabilities and Services

- Report on Hardware and Software Inventory**
 Get up-to-date accurate details on hardware and software inventory across your fleet.
- Assess Device Security Posture**
 Detect and report on anti-malware software installed.
- Gain Insights into Web and Device Usage**
 See amount of time spent using each device and how much active time spent on web-based approved educational resources.
- Track Device Location and Movement**
 Determine accurate device location, establish geo-fencing to detect unauthorized device movement, and receive alerts when device leaves pre-defined boundaries.
- Freeze At-Risk Devices**
 Remotely disable use of missing or stolen devices and display custom on-screen message requesting device return.
- Maintain Device Health and Remediate Threats**
 Use a library of custom scripts to remotely configure, decommission, and address vulnerabilities across your device fleet.
- Self-Heal Vital Device Management Tools**
 Keep essential device management tools like Microsoft Endpoint Configuration Manager, formerly Microsoft System Center Configuration Manager (SCCM), and Microsoft Intune installed, healthy, and working effectively.
- Investigate Stolen Devices**
 Leverage Absolute's experienced investigations team for recovery of stolen devices in collaboration with law enforcement.
- Managed Missing Devices Reclamation Service* (once a year)**
 Use Absolute's team of reclamation experts to track, locate, and secure missing devices, including contacting users to get devices back.

*Also available as an add-on SKU in North America

Missing Device Reclamation Service: How It Works

Availability, Pricing, and Terms

Testimonials

“

We were able to provide the board with quantitative information about device utilization that drives consensus so the budget could be approved. Also, peace of mind with security, privacy, and theft recovery.

Dr. Rich Contartesi,
CIO,
Loudoun County Public Schools
78,000 students

“

Absolute helps us maximize the number of laptops we get back in a timely manner. If we don't have the equipment in place, we can't equip our students.

Erik Greenwood,
Chief Technology Officer,
Anaheim Union High School District
