

## Data points collected by Absolute Application-Persistence-as-a-Service (APaaS)

Absolute Application-Persistence-as-a-Service (APaaS) collects a default set of data to provide Application Health Telemetry and Insights reports to APaaS ISVs. Listed below are the data fields collected and the Grouped Name column indicates how the data points are used. For APaaS-enabled products the 'Health Monitoring' and 'AP' data group fields are specific to application resiliency of the application. Absolute's firmware persistence is supported by the 'BIOS Persistence Mgmt', 'Communication', 'Agent' and 'BIOS' data groups. The 'AV' and 'Encryption' data groups are used to report on active Antivirus and Encryption products. The remaining data group fields are utilized for unique device identification.

Field	Grouped Name
Computer Make	BIOS Persistence Mgmt - Computer Make
Computer Model	BIOS Persistence Mgmt - Computer Model
BitLocker Status	BIOS Persistence Mgmt - BitLocker Status
Computer Serial	Device Identification - Computer Serial
Computer Asset	Device Identification - Computer Asset
Computer Name	Device Identification - Computer Name
HDD Serial Number	Device Identification - HDD Serial Number
Computer UUID	Device Identification - Computer UUID
RAM Serial Number	Device Identification - RAM Serial Number
Battery Device ID	Device Identification - Battery Device ID
MAC Address	Device Identification - MAC Address
System Bios Version	Analytics - System Bios Version
System Bios Date	Analytics - System Bios Date
OS Product Key	Analytics - OS Product Key
HDD Model	Analytics - HDD Model
NIC Adapter Name	Analytics - NIC Adapter Name
Computer Product ID Number	Analytics - Computer Product ID Number
Computer Product Name	Analytics - Computer Product Name
CPU Description	Analytics - CPU Description
Persistent Agent Version	Analytics - Persistent Agent Version
BIOS SN Version	Analytics - BIOS SN Version
TCG Support	Analytics - TCG Support
WMI Status	Analytics - WMI Status
ATP Capable	Analytics - ATP Capable

Bios Default Language	Analytics - Bios Default Language
UEFI Bios	Analytics - UEFI Bios
Tablet	Analytics - Tablet
CPU Datawidth	Analytics - Pablet Analytics - CPU Datawidth
Serial Data64	Analytics - CFO Datawidtii Analytics - Serial Data64
Remote IP	Communication - Remote IP
Local IP	Communication - Kemote IP
Proxy IP	Communication - Proxy IP
ISV Agent Health Status	Health Monitoring - ISV Agent Health Status
ISV Agent Health Status Details	Health Monitoring - ISV Agent Health Status Details
ISV Agent Version	Health Monitoring - ISV Agent Version
ISV Install Location	Health Monitoring - ISV Install Location
Identifier	Agent - Identifier
Last connected	Agent - Last connected
Agent Status	Agent - Agent Status
Agent	Agent - Agent
Component manager	Agent - Component manager
Component manager > Status	Agent - Component manager > Status
Persistence agent	Agent - Persistence agent
Device name	Device - Device name
Username	Device - Username
Domain	Device - Domain
Encryption Status	Device - Encryption Status
Full system name	Device - Full system name
Name	OS - Name
Version	OS - Version
Build	OS - Build
CSDVersion / OS Service Pack	OS - CSDVersion / OS Service Pack
Architecture	OS - Architecture
Install date	OS - Install date
Last boot time	OS - Last boot time
Update build revision	OS - Update build revision
Current build	OS - Current build
Release ID	OS - Release ID
Edition ID	OS - Edition ID
Manufacturer	OS - Manufacturer
Product key	OS - Product key
Serial number	OS - Serial number
Windows directory	OS - Windows directory
Other OS description	OS - Other OS description
